

PEDICURES

– PLUS –

PEACE OF MIND.

Family Foot Center is Spokane's only qualified medical spa specializing in feet. We now offer medical-grade pedicures using disinfecting and sterilization techniques found in hospitals.

What is the difference between a medical spa and a regular spa?

A medical spa offers many of the same treatments and comforts as the typical spa you may have visited, with one very important difference: a licensed healthcare professional on site, involved in the care of your feet.

If you have diseased or infected toenails, your technician will work directly with one of our Board Certified Podiatrists to meet all your needs.

At the Family Foot Center, we use hospital grade disinfectants, and our sanitation procedures meet or exceed OSHA/ WISHA standards for maintaining a clean environment to prevent the spread of germs and disease. In fact, our sterilization techniques are the same as those used in hospital settings for surgical instruments.

Call today to schedule an appointment for your pedicure, then *RELAX* knowing you're in a clean environment!
